ACTIVITY A7
Follow Up a Nonconformity and Corrective Action

Follow up improvement from containment through root cause, action and effectiveness review.

Participant scenario and completion checklist

Version 1.0 | 30 September 2026

Scenario

Twenty-four parts were produced to revision B after the customer approved revision C. Eight were shipped before the error was detected.

Organisation: LionCity Precision Components Pte Ltd (LPC). A Singapore SME with 85 employees producing precision aluminium components for commercial equipment.

Your task

Manage LPC's obsolete-drawing nonconformity using containment, 5 Whys, action planning and effectiveness criteria.

Expected output: A complete NCR/CAPA record with evidence-based root cause and an effectiveness review plan.

Decision questions

1. What correction and containment are needed immediately?

2. What system cause allowed the obsolete revision to reach production?

3. What evidence and time window will demonstrate non-recurrence?

Completion checklist

Done	Check	Evidence/reference
[ ]	Record the nonconformity, affected scope, risk and immediate correction.	
[ ]	Contain suspect product and protect the customer while tracing affected records.	
[ ]	Use 5 Whys and cause-and-effect thinking; validate the systemic root cause with evidence.	
[ ]	Assign corrective actions to causes with owners, dates and required resources.	
[ ]	Define and later perform an effectiveness review using trend and audit evidence.	
[ ]	All conclusions are traceable to evidence; assumptions are labelled.	
[ ]	A peer has challenged one key decision and the response is recorded.	
[ ]	The workbook passes the acceptance test below.	

Acceptance test

Actions address verified causes, not only symptoms; the effectiveness criterion is measurable and scheduled after sufficient evidence can accumulate.

Submission and debrief

Submit the completed Excel workbook using the trainer's naming convention. Be ready to explain one evidence-based decision, one uncertainty, and one improvement you would make with better data.
