ACTIVITY A8
Document the Continual Improvement Report

Document a QMS improvement activity report according to organisational procedures.

Participant scenario and completion checklist

Version 1.0 | 30 September 2026

Scenario

Three months after LPC launched its improvement programme, management needs evidence of results, unresolved risks and recommended next actions.

Organisation: LionCity Precision Components Pte Ltd (LPC). A Singapore SME with 85 employees producing precision aluminium components for commercial equipment.

Your task

Synthesize evidence from all prior activities into an accountable improvement report and management-review recommendation.

Expected output: A structured improvement report with baseline, analysis, decisions, responsibilities, evidence and lessons learned.

Decision questions

1. What changed relative to baseline and target, and how reliable is the evidence?

2. Which actions are complete, overdue, ineffective or awaiting evidence?

3. What should management decide about resources, changes and standardisation?

Completion checklist

Done	Check	Evidence/reference
[ ]	Define the report audience, approval route and required organisational fields.	
[ ]	Summarise the original problem, baseline, scope and intended result.	
[ ]	Present analysis, actions, owners, dates and evidence of implementation.	
[ ]	Compare results with targets and state the effectiveness conclusion with limitations.	
[ ]	Record lessons, residual risks, decisions required and follow-up actions.	
[ ]	All conclusions are traceable to evidence; assumptions are labelled.	
[ ]	A peer has challenged one key decision and the response is recorded.	
[ ]	The workbook passes the acceptance test below.	

Acceptance test

A reviewer can reconstruct the improvement story from evidence and clearly see ownership, status, approval, effectiveness and next review date.

Submission and debrief

Submit the completed Excel workbook using the trainer's naming convention. Be ready to explain one evidence-based decision, one uncertainty, and one improvement you would make with better data.
